BUSINESS REQUIREMENTS DOCUMENT	
Request Title	1. Creation of cheque book request portal 2. Maintenance of cheque book range on FINACLE
Request Type	1. A portal where cheque book request will be made by branches to head office 2. Cheque leaves maintenance on FINACLE before sending it out to branches.
Objective of the Request	1. For adequate record keeping and managing requests from all branches 2. To be able to cancel cheques based on customer's instruction and to avoid fraudulent transactions
Date	27/07/2026

VERSION CONTROL

1. There was no existing cheque book request portal so this will be the first version of the cheque book request in Nova
2. The version of FINACLE used now has cheque maintenance function but it is not activated, this needs to be activated for better record keeping of cheque books on FINACLE.

BACKGROUND AND PURPOSE/SCOPE

1. The use of mail for cheque book requests could lead to missing out on some requests, hence the need for portal where all branches log in their request. It is easier to spool their requests and process, this will also help with our monthly reconciliation.
2. The method of receiving cheque books and sending them to various branches without maintaining the leaves and necessary details on FINACLE, hence the need for maintenance of cheque book range on FINACLE to enable branches cancel/destroy leaves based on customer request.

Benefits

1. To enable all branches request for cheque book electronically via a portal which will enable us spool report for monthly reconciliation and to track requests across all branches.
2. Inputting the cheque numbers on FINACLE and assign the appropriate branch before dispatching the cheque book. This will enable branches to monitor the leaves, destroy cheque leaves based on customer instruction or stolen cheque and identify forged cheques.

AS-IS DEFINITION

1. Email request for cheque requests across all branches
2. No updating of cheque book range on FINACLE before release to customers

to-be definition

1. Portal for cheque book request
2. Inputting cheque book range on FINACLE

In Scope

- Development of a centralized Cheque Book Request Portal.
- Automated workflow for cheque book requests.
- Cheque book request tracking and status updates.
- Management Information System (MIS) reporting.
- Audit trail of all user activities.
- Cheque maintenance functionality within Finacle.

Out of Scope

- Cheque printing process performed by the external vendor.
- Courier or logistics arrangements for cheque delivery.
- Procurement and inventory management of cheque stationery.
- Changes to Finacle functionality unrelated to cheque maintenance.

SOLUTION ARCHITECTURE DIAGRAM

1. **FOR CREATION OF CHEQUE BOOK REQUEST PORTAL**

Step 1: Request Initiation at Branch – Request initiated by the Customer Service Officer (CSO) of any of the branches

Step 2: Validation – system validate the account status, KYC, customer eligibility, confirmation of debit.

Step 3: Approval Process - Auto Approval

Step 4: Head Office Processing – Spool and review the request confirming request is correct and in line with the approved format from the vendor (Superflux)

Step 5: Cheque printing - Cheque encryption to vendor. (outside the portal)

Step 6: Acknowledgement and File response sent by vendor notifying the bank that the cheque book has been printed and ready for pick up.

2. **FOR MAINTENANCE OF CHEQUE ON FINACLE**

Activate the already existing menu on FINACLE to enable the input of cheque range on Finacle. With this, it can enable branches to destroy cheque leaves and monitor cheque leave usage.

PROCESS FLOW CHART

1. FOR CREATION OF CHEQUE BOOK REQUEST PORTAL

Customer Visits Branch and Requests Cheque Book

↓

Customer Service Officer Logs into Cheque Book Portal

↓

Search Customer Account Number

↓

Portal Retrieves Customer Data from Finacle
